

João Freitas

Software Engineer

Porto, Portugal | joao.mag.freitas@gmail.com | 912 844 158 | github.com/joaomagfreitas

Profile

Experienced Software Engineer (6YoE) in mobile development with Flutter/Dart, Android/Kotlin, iOS/Swift, TypeScript and Go

Experience

Software Engineer, Karma – Porto Feb 2025 – present

- Helped build and grow the Karma mobile app and Safari Web Extension (SWE), shipping new features and improvements to increase revenue streams. Used A/B testing and KPI data to guide product decisions.
- Led development of the mobile app to integrate with Imageye browser extension, giving value to existing users by providing them a way to download and organize images in their iPhones.
- Redesigned the Sudoku on the Rocks game using gamification techniques, to entertain the player and create new revenue streams using video ads.
- Flutter, Kotlin, Swift, React, Bitrise, Codemagic

Software Engineer, Critical TechWorks (Android Automotive) – Porto Aug 2022 – Sept 2024

- Android Automotive developer on BMW and MINI iDrive 9 OS.
- Worked in the speech domain to bring Alexa and transform BMW voice assistant to have full new set of capabilities, which the old stack (Cerence SDK) did not provide, using the Alexa Custom Assistants (ACA) SDK.
- Teamed closely with Munich colleagues (BMW) and also with teams from Canada and California (Amazon).
- Android Automotive, Kotlin, Alexa Engine, Alexa Skills SDK

Software Engineer, Critical TechWorks (Mobile Development) – Porto Dec 2019 – July 2022

- Flutter developer on BMW and MINI smartphone apps.
- Brought personalisation and welcome features to life (user avatar, account synchronization, deep linking, Alexa Skills).
- Worked closely with colleagues from all over the world around the world (Portugal, USA, Germany, Brazil, China)
- Flutter, BLoC, UI Testing, KISS, Pair Programming, Scrum

Education

FCUP - Faculdade de Ciências da Universidade do Porto, MSc (dropout) in Information Security – Porto Sept 2022 – July 2023

- Theory and Practice of Security Attacks, Operations Security (SOC), Privacy Enhancing Technologies (PET), Network Security, Applied Cryptography

ISEP - Instituto Superior de Engenharia do Porto, BSc + MSc in Software Engineering Sept 2016 – July 2021
– Porto

- Domain Engineering, Requirements Engineering, Software Architecture, Mobile Systems, Concurrent and Reliable Software, Functional Programming, Systems Integration, Software Engineering Principles, Development Practices, Computing and Programming Languages Foundations, Relational Databases, Logic Programming, Network and Systems Administration
- Thesis (not delivered): Verification of energy non functional requirements using information & meta-information annotations
